

Hudson Bay Railway - Gillam, Manitoba Transload

Hudson Bay Railway has a new transload site at Gillam, Manitoba specifically designed to meet the needs of suppliers to major construction projects in Northern Manitoba.

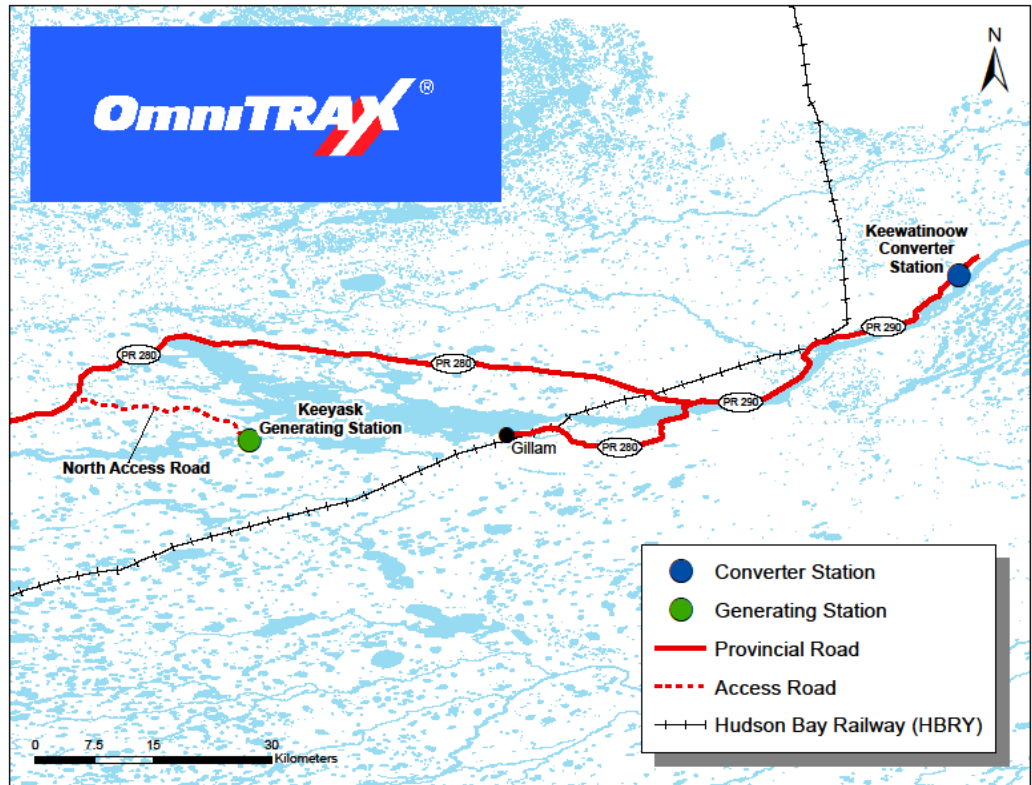

Location:

- 139 km from the Keeyask dam site - the shortest highway distance to the project.
- 79 km from the Keewatinoow converter site.

The new transload allows suppliers to harness the efficiency of rail transportation to move their goods to Gillam, Manitoba where our team of professionals will transfer the goods to truck for transport over the final kilometers to the work site.

Working with local experts, we have put in place transfer equipment to handle all matter of goods including pipe, rebar, lumber, electrical equipment. We have cranes available with all of the attachments required to safely transfer your goods from rail to truck. We have trucks of all types available for the final leg of the journey.

Please contact us at: (204) 677- 4338 and we will be happy to provide you with all the information you need to get your goods moving quickly and efficiently all the way to the final destination.
