

OmniTRAX Environment, Health, Safety & Security (EHS&S) Policy

OmniTRAX considers safety, security and the protection of health and environment as part of our core values that are prerequisite and essential to the long-term success and sustainability of our business.

We shall conduct our operations in a manner that protects the safety and health of our employees, contractors and the public as well as the quality of the environment. This EHS&S policy is founded upon the values set forth in Responsible Care® and its Guiding Principles as well as the OmniTRAX EHS&S Policy. No economic priority shall overrule these principles. In support of this policy, we will:

1. Design and operate our facilities to ensure operational safety, optimize resource conservation, reduce waste and emissions and minimize adverse impact on health and the environment.
2. Comply with applicable laws, regulations, codes and standards, and provide monitoring to ensure compliance.
3. Seek continual improvement in EHS&S and quality performance with the goal to eliminate accidents and incidents.
4. Protect employees, assets, information and corporate reputation by maintaining comprehensive security systems.
5. Establish effective EHS&S management systems that promote practices beyond regulatory compliance, routine evaluation of system performance and a framework of setting EHS&S goals, objectives and targets.
6. Integrate the principles of sustainable development into our decision-making.
7. Choose suppliers, partners, and contractors that share and adhere to our principles.

8. Perform transportation services that, when properly performed, will not pose an unacceptable threat to safety, health and the environment.
9. Communicate to employees, contractors, customers, and the public any known hazards of our operations or material storage.
10. Encourage listening, mutual support, and the sharing and communication of Best Management Practices (BMPs) while promoting transparency among stakeholders.
11. Support and encourage innovative technology and research BMPs within our industry to promote continuous improvement and seek reasonable solutions to EHS&S challenges.
12. Review and test emergency procedures to ensure a prompt and effective response.
13. The management of each OmniTRAX-managed property is responsible for implementation of this Policy, and all employees and contractors have a personal responsibility to adhere to these principles. EHS&S performance shall be an important element in the evaluation of employees and contractors.

Sergio Sabatini
Chief Operating Officer
